VED PATEL

Computer Engineering • Linux, Docker & DevOps Enthusiast

+91-7383544236 • patelved5258@gmail.com • linkedin.com/in/vedpatel5258 • github.com/patelved546513546 • Mehsana, Gujarat, India

PROFESSIONAL SUMMARY

Motivated Computer Engineering student with hands-on experience in Linux environments, Open edX platform administration, Docker-based workflows, and system configuration. Interested in DevOps, system reliability, and cybersecurity. A dedicated, hardworking learner with strong problem-solving abilities and quick adaptability, currently building practical skills across AI, cloud, and infrastructure technologies while looking for an opportunity to start and grow a career in the field.

TECHNICAL SKILLS

Systems & DevOps:	Docker & Container Management, Linux Administration, Bash Scripting, Networking Fundamentals
Security:	Cybersecurity Tools & Techniques, Kali Linux, Metasploit, Vulnerability Enumeration
Programming & Databases:	Python Scripting & Automation, SQL & MongoDB, HTML, CSS, JavaScript, Node.js
AI/ML & Monitoring:	PyTorch, FastAPI, Ollama LLM Deployment, Prometheus & Grafana, Scikit-Learn
Developer Tools:	Git, GitHub, VS Code, Linux Server CLI

INTERNSHIP EXPERIENCE

Open edX LMS Administrator & Frontend Developer Intern — Feb 2026 – May 2026

Ganpat University — IT Department, Mehsana, Gujarat

- Participated in Open edX migration and configuration tasks for the Ulmo release, customizing LMS frontend, themes, navigation, and Micro-Frontends (MFEs).
- Automated student onboarding and bulk course enrollment using Python scripts; assisted with course upload, verification, and certificate configuration.
- Configured SMTP email settings, restarted Open edX services for system updates, and administered Linux-based hosting environments.

Conversational Data Analysis with Large Language Models (LLMs) — 11 Sep 2025 – 08 Oct 2025

Vodafone Idea (VOIS) – Edunet Foundation | AICTE Virtual Internship

- Completed an AICTE-approved virtual internship on Conversational Data Analysis using Large Language Models, analyzing conversational datasets and gaining exposure to real-world LLM use cases for decision support.

Artificial Intelligence & Cloud Technology Intern — 09 Sep 2025 – 07 Oct 2025

IBM SkillsBuild — Edunet Foundation (AICTE) | Virtual Internship

- Completed a 4-week AICTE-approved virtual internship on AI and Cloud Technology. Gained foundational knowledge of AI concepts, models, and cloud computing workflows.

FEATURED PROJECTS

CareMind AI — Multi-Modal Clinical Decision Support Platform — Academic Project

Python • FastAPI • PyTorch • Ollama (Llama-3.1) • Node.js/Express • Docker Compose • Prometheus/Grafana

- Designed a dual-engine architecture pairing a PyTorch multi-label neural classifier for disease scoring with a locally hosted, Pydantic-schema-constrained LLM (via Ollama) for report generation.
- Built a multi-modal input pipeline fusing text symptoms, body-map pain data, and OCR-parsed lab values with unit normalization, containerizing the 5-service stack with Docker Compose and live Prometheus/Grafana dashboards.
- Implemented an async CPU inference queue with circuit-breaker timeout handling and deterministic fallback caching, validated with automated safety tests.

TechResque — Instant Service Auto-Assignment Platform — Personal Project

JavaScript • Node.js • Express • MongoDB • WebSockets

- Built an on-demand service dispatch platform with sub-100ms algorithmic provider auto-assignment, multi-specialty filtering, fair distribution, and real-time push alerts within 5 seconds.

Predictive Solar + EV Microgrid Energy Dispatch — Personal Project

Python • Quantile Regression ML • Streamlit • Open-Meteo • Ausgrid Data

- Trained pinball loss quantile regression models forecasting P10/P50/P90 net-load uncertainty, dropping RMSE by 90% (20.75 down to 2.03) to power battery storage peak shaving and cost cuts.

Cybersecurity Testing Lab & SIEM — Personal Project

Kali Linux • Metasploitable2 • Elasticsearch • Logstash • Kibana • Vulnerability Analysis

- Deployed an ELK Stack SIEM for real-time SSH brute force attack detection, syslog ingestion, and performed penetration testing against Metasploitable2 test targets.

EDUCATION & CERTIFICATIONS

B.Tech in Computer Engineering — Ganpat University (UVPCE) — 2023 – Present | CGPA: 7.26

Certifications: Google Cloud Cybersecurity Certificate • Cisco Introduction to Cybersecurity • AICTE Approved Certifications
